Southern Arc Minerals Inc (PT. SAMI)

Requested not to Sell its Enterprise

Oleh admin

Kamis, 19 April 2007 09:18:59

Sumbawa Barat, Tambangnews.Com. - Of the presence of PT. SAMI, which has carried out exploration in the Lemuntet, West Sumbawa area, it is hoped it can move forward to exploitation. Even though the layout of the West Nusa Tenggara government does not offer any new opportunity for mining investment. "It is not possible for our economy to improve if there is no investment," stated M. Nasir, ST., MLA W Sumbawa Legislature from National Mandate Party (PAN) which recently completely goes along with the BINTEK facility. Nasir stated, the W Sumbawa government must prepare itself before PT. SAMI implements exploitation in West Sumbawa. Preparation meaning including in formation of a Contract of Work, which subsequently changed to become a Ijin Raya (IR) must be likewise aimed towards Ordinance Number 32 - 2004 regarding Regional Autonomy.

"What is imperative is that transparency must be established with providing space to the people in order that the company cannot play shenanigans beforehand", stated Nasir.

Still according to Nasir, the company must also demonstrate care towards the public tied to its Community Development Program (CSR) with a continuous and significant orientation towards such a proram.

Nasir is convinced, if the program implemented by PT. SAMI in accordance with the desires and needs of the public, then it will fulfill the prosperity of the community. With such there will emerge a peaceful, safe and prosperous life.

KPK

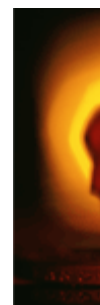

Meanwhile according to Drs. H. Zulkifli Daud, also Chairman of United Development Party (F-PPP), it is hoped that in order that the eventual mineral exploitation will be carried out solely by PT. SAMI by itself, not by the means of selling it to another entity.

"We request that mineral exploitation in the area already explored by PT. SAMI must also be exploited by PT. SAMI. We request the company not be traded," insisted Dhea Guru, closely addressed by Zulkifli Daud similarly adding, specifically for [the benefit of] PT. SAMI[s ears].

However, Dhea Guru's statement was countered by Nasir and that according to the regulations in effect any company whatsoever can implement exploitation. Thus in each implementation stage PT. SAMI could act as a sort of consultant or company that has good achievements in the field of exploration but not yet fully qualified in the field of exploitation.(sn02)
